About Us

E Tech | Eligico Technology Solutions is a systems integration and technology infrastructure company delivering enterprise-grade low-voltage, security, networking, and smart building solutions for commercial, hospitality, government, military base, data center, and mission-critical environments.

We specialize in structured cabling, fiber infrastructure, enterprise surveillance, access control, networking, audio-visual integration, and intelligent building technologies for large-scale facilities and complex deployments.

Our team supports commercial high-rises, data centers, mixed-use developments, hospitality properties, federal projects, and military-base facilities requiring professional coordination, scalability, and high-performance infrastructure solutions.

ETECH - ELIGICO FAMILY OF COMPANIES

Licensed California C-7 Systems Integration Contractor providing engineering, installation, service, infrastructure deployment, and long-term technology support solutions.

Our Team

Our team consists of experienced technology professionals, engineers, and infrastructure specialists. Delivering enterprise solutions for commercial, government, military base, and mission-critical environments. From data centers to large-scale infrastructure deployments, we are committed to quality, professionalism, safety, and long-term client success.

Our Goals

To deliver enterprise technology infrastructure and integrated systems solutions that support commercial, government, military-base, hospitality, and mission-critical environments through innovation, reliability, and professional execution.

Vision

Supporting the future of smart infrastructure and connected technologies.

Mission

Deliver scalable, high-performance technology and infrastructure solutions.

Values

Quality, reliability, safety, innovation, and long-term partnerships.

Our Services

We deliver enterprise low-voltage infrastructure and integrated technology solutions for commercial, hospitality, government, military base, and mission-critical environments, ensuring secure connectivity, scalability, and reliable system performance.

Enterprise Surveillance Systems
Structured Cabling Infrastructure
Data Center Solutions
Fiber Optic Backbone Systems
Networking & Wi-Fi Solutions

Access Control Systems
